
COMPANY PROFILE

Engineering, software, and AI for **what's next.**

Software engineering, IT consulting, and data and AI capabilities for organizations across the Middle East and beyond.

01

Engineering teams

02

Business software

03

Data and AI

One partner for engineering, business software, and data & AI.

VO combines IT consulting, software engineering, and data and AI work for organizations across the Middle East and beyond. Our mission is to help organizations grow with practical software that connects complex systems to everyday work. We focus on lasting relationships rather than one-time projects.

01

Innovation

02

Integrity

03

Agility

04

Partnership

20+

Government & enterprise clients across the region

1800+

Framework skills across our engineering teams

8

Ready-to-deploy products

01

Outsourcing

Engineers and consultants within client teams, or as dedicated engineering teams.

02

Solutions & products

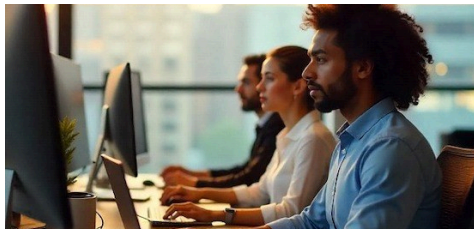

Enterprise applications, CRM and ERP platforms, and mobile software.

03

Data analysis & AI

Data systems, analytics, machine learning, and automation for operational and decision support.

Three service areas, one delivery model.

Outsourcing

Senior engineers and consultants join your team, from individual specialists to complete engineering teams.

- Application development & maintenance
- Infrastructure, helpdesk & networks
- IT consulting & system integration
- Mobile, cloud, RPA, IoT
- Engineering, R&D and analytics

Solutions & products

End-to-end software on proven frameworks, plus ready-to-deploy products.

- .NET Core, Node.js & Laravel platforms
- CRM & ERP with Creatio and Odoo
- Custom enterprise applications
- Mobile experiences
- Cloud & cybersecurity built in

Data analysis & AI

Turn operational data into useful information with machine learning, automation and analytics.

- Data collection & integration
- Data processing pipelines
- Machine learning & AI models
- Insights & decision support
- Cloud, on-premise or hybrid deployment

Capabilities built for decisions.

- **Predictive modeling**

- **Anomaly detection**

- **Natural language processing**

- **Computer vision**

- **Dashboards and reporting**

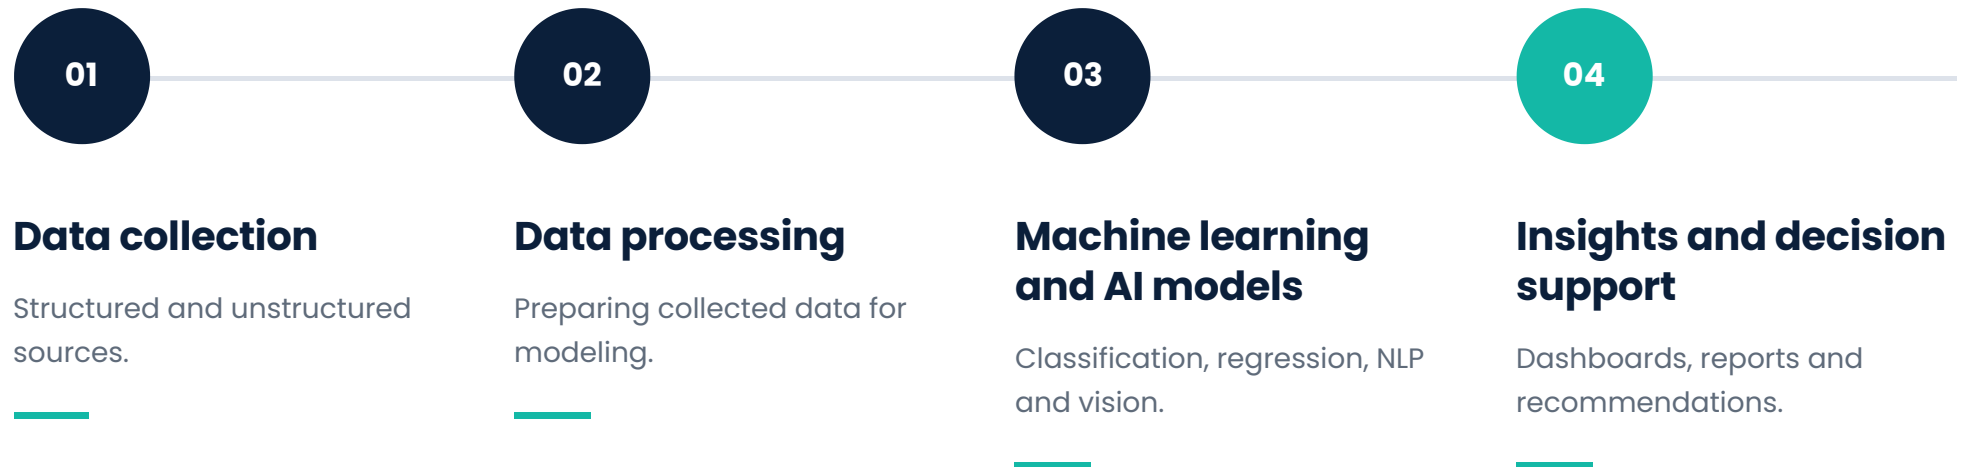

- **Recommendation engines**

DEPLOYMENT OPTIONS

Fits your environment.

- Cloud-native and on-premise
- Hybrid environments
- API-first integration
- Machine learning pipelines
- Domain-specific model training

From data to decisions in four stages.

Delivered cloud-native, on-premise, or hybrid.

API-first integration with existing systems and machine learning pipelines.

Where the work applies.

GOVERNMENT

Smart city operations

Dashboards for municipal resource management and urban planning.

FINANCE

Risk and fraud detection

Transaction-pattern analysis and anomaly detection for financial institutions.

AGRICULTURE

Resource planning

Water and crop planning using satellite data and predictive models.

RETAIL

Demand forecasting

Inventory and demand prediction for retail and logistics.

PUBLIC SECTOR

Digital services

Citizen-service platforms and cross-department workflows.

HAJJ

Crowd and logistics

Crowd analytics and logistics planning for mass gatherings.

● Application areas described in the 2025 profile. They are not presented as verified project case studies.

The technologies behind 1800+ skills.

8+

frameworks and platforms our engineers master, with senior engineers across .NET Core, Node.js, Laravel, Creatio, Odoo, cloud, cybersecurity and mobile.

● Framework marks belong to their respective owners and are shown for identification only. Mobile development is represented by the React mark.

Eight ready-to-deploy products.

01

GeoBank

Spatial analytics for ArcGIS

Map, analyze and share geographic data with secure, multi-level administration, built for ArcGIS 10.x.

02

Geo Sales Manager

Sales Force E-Supervisor

Supervise field sales teams in real time with location-aware tracking, visits and reporting.

03

Vehicle Tracking System

Fleet & AVL tracking

Monitor every vehicle live, optimize routes and cut operating costs across your fleet.

04

GEO ETL

Extract, transform, load

Move spatial and business data between systems with reliable, automated ETL pipelines.

05

ISignage Pro

Smart interactive signage

Manage digital screens and interactive content from one central, cloud-based platform.

06

Automotive ERP (4SPlus)

Automotive industry ERP

ERP system for the automotive industry.

07

PMO Cloud

Project management office

Plan, track and report on portfolios, projects and resources in a single PMO system.

08

Correspondence Tracking

Correspondence management

Register, route and archive official correspondence with full traceability and workflows.

OUR CLIENTS

Trusted by government and enterprise leaders.

 B.Tech	 Royal Commission for Riyadh City	 Amanah Al-Taif	 Amanah Makkah Al-Mukarramah
 Kuwait Municipality	 KACST	 Central Bank of Libya	 Ministry of Environment, Water & Agriculture
 Ministry of Hajj & Umrah	 Ministry of Interior (Libya)	 Ministry of Municipal, Rural Affairs & Housing	20+ government and enterprise clients across the region

Also named in the 2025 profile

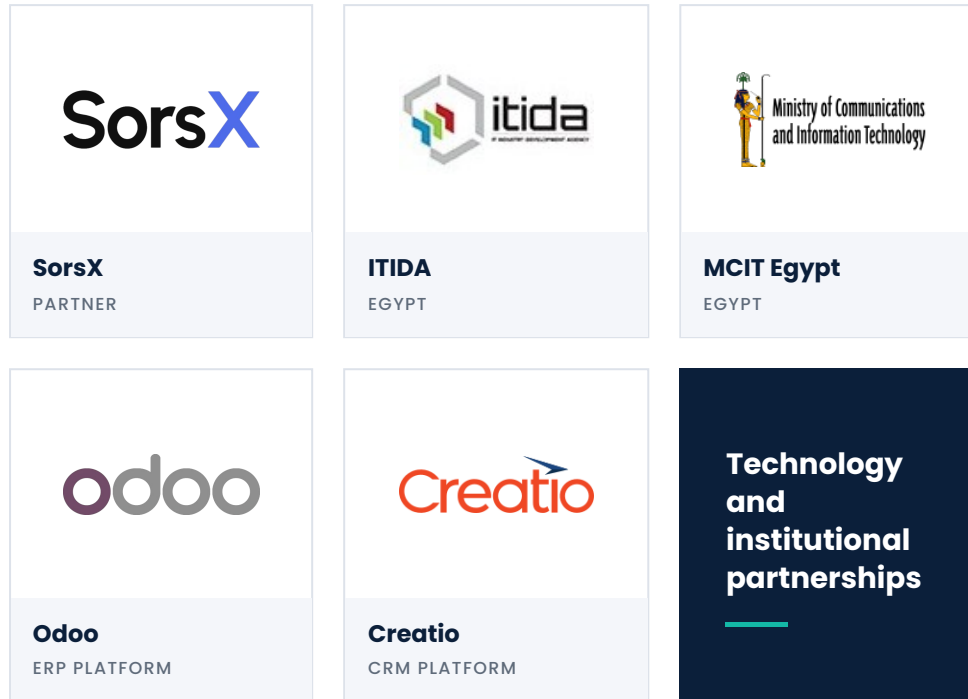

ENTERPRISE & PRIVATE SECTOR

Bin Dalbah Trading	AlDahayan Trading	Saleh Cars Group	Three S	AlHamidi Cars	AlSharaf Cars	Rotana Cars	Class Cars
Dagmal							

Logos and names are shown for identification. Project scope and current relationship status are not stated; marks belong to their respective owners.

OUR PARTNERS

Technology & institutional partners.

- Partners as listed on the VO website and 2025 profile. Names and marks belong to their respective owners; inclusion is not an endorsement.
