THE COMPANY

What VO does

VO combines IT consulting, software engineering, and data and AI work. Its 2025 profile describes three service areas.

01 Outsourcing

Engineers and consultants can work within client teams or as dedicated engineering teams.

Staff augmentation / Engineering teams / Consulting

02 Solutions and products

Enterprise applications, CRM and ERP platforms, and mobile software.

.NET Core / Node.js / Laravel / Creatio / Odoo / Mobile

03 Data analysis and AI

Data systems, analytics, machine learning, and automation for operational and decision support.

Machine learning / Predictive analytics / Automation

STATED VALUES

Innovation / Integrity / Agility / Partnership

CAPABILITIES

From data to decisions

The profile identifies the following capabilities and deployment options. The four stages below reflect its stated workflow.

CAPABILITIES

Predictive modeling

Anomaly detection

Natural language processing

Computer vision

Dashboards and reporting

Recommendation engines

DEPLOYMENT OPTIONS

Cloud-native and on-premise

Hybrid environments

API-first integration

Machine learning pipelines

Domain-specific model training

WORKFLOW

01 Data collection

Structured and unstructured sources

02 Data processing

03 Machine learning and AI models

Classification, regression, NLP and vision

04 Insights and decision support

Dashboards, reports and recommendations

INDUSTRY USE CASES

Where the work applies

The 2025 profile describes applications across government, finance, agriculture, retail, public services and large gatherings.

GOVERNMENT

Smart city operations

Dashboards for municipal resource management and urban planning.

FINANCE

Risk and fraud detection

Transaction-pattern analysis and anomaly detection for financial institutions.

AGRICULTURE

Resource planning

Water and crop planning using satellite data and predictive models.

RETAIL

Demand forecasting

Inventory and demand prediction for retail and logistics.

PUBLIC SECTOR

Digital services

Citizen-service platforms and cross-department workflows.

HAJJ

Crowd and logistics

Crowd analytics and logistics planning for mass gatherings.

These application areas are not presented as verified project case studies.

PORTFOLIO

Named products

Eight products listed in VO's 2025 company profile.

01 **GeoBank**

02 **Vehicle Tracking System**

03 **PMO Cloud**

04 **Correspondence Tracking and Management System**

05 **Automotive Industry ERP (4SPlus)**

06 **ISignage Pro**

07 **Geo Sales Manager**

08 **GEO ETL**

LISTED IN THE 2025 PROFILE

Organizations & alliances

Organizations and technology relationships named in the 2025 company profile.

GOVERNMENT & PUBLIC SECTOR

Royal Commission for Riyadh
